2ERKN
Silicone Coated Film

Mitsubishi Chemical America, Inc.

Product Bulletin

Description

Hostaphan™ 2ERKN is a one side silicone coated film with moderate haze. This special silicone coating is formulated to give premium release from a wide range of adhesives. Along with high strength, flexibility, and chemical resistance, this product provides good dimensional stability over a wide temperature range.

Performance

The silicone coating on Hostaphan™ 2ERKN is specially treated prior to winding. This special treatment minimizes back-side transfer of the silicone, which may affect adhesion. Because the silicone is highly cured, there will be essentially no migration of the silicone to any adhesive which may be in contact with the film.

Benefits

- Minimum silicone transfer
- Provides very consistent release level with aging
- Clear silicone coating
- Highly cured coating which does not smear
- Better than 95% subsequent adhesion
