Product Bulletin

Description

Hostaphan® 43SM is an ultra-clear polyester film that is chemically treated on one side to improve handleability and reduce potential for scratching. It combines high durability and optical clarity.

Performance

Hostaphan® 43SM is designed for markets requiring glass-like clarity. 43SM is chemically treated on one side to provide resistance to scratching and the slip necessary to handle and wind an unfilled film. The treated surface is not designed for adhesion.

Benefits

- Excellent handling achieved by slip treatment
- Superior base film flatness
- Excellent color and clarity
- Reduced potential for scratching
